## Structural vibration resistant fasteners with high clamp load performance and multi-grip capabilities

Avdel® lockbolts are specified whenever robust and reliable fastening is desired. Our intelligent fastening systems and durable, ergonomic installation tools create an ideal assembly solution in any manufacturing environment.

Avdel® structural lockbolts consist of a separate pin and collar which are mechanically locked during installation. Our fasteners form joints capable of withstanding the toughest applications and environments that traditional rivet and screw joints often cannot provide. They offer exceptional resistance to vibration and material fatigue due to the swaged lock which forms collar material permanently into the circular grooves of the bolt.

Avdel® structural lockbolts can be installed quickly and easily without the need for special training or the skilled labour that's often required for other fastening methods. This simple installation process eliminates negative manufacturing influences including examples of RSI (Repetitive Strain Injury) – thus ensuring safety & quality from the first to the last installation.

Avdel® structural lockbolts are mostly used in the automotive, HGV & transportation markets as well as machinery and equipment manufacturing, heating and ventilation, and metal fabrication and construction.

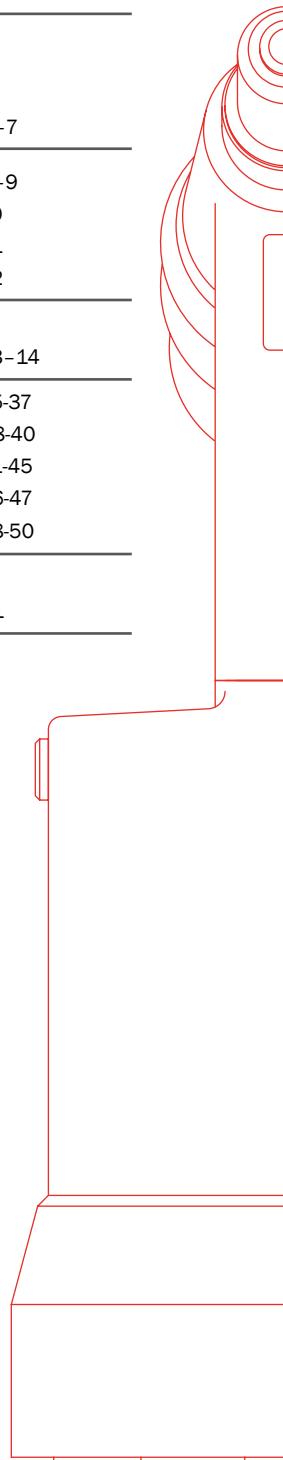

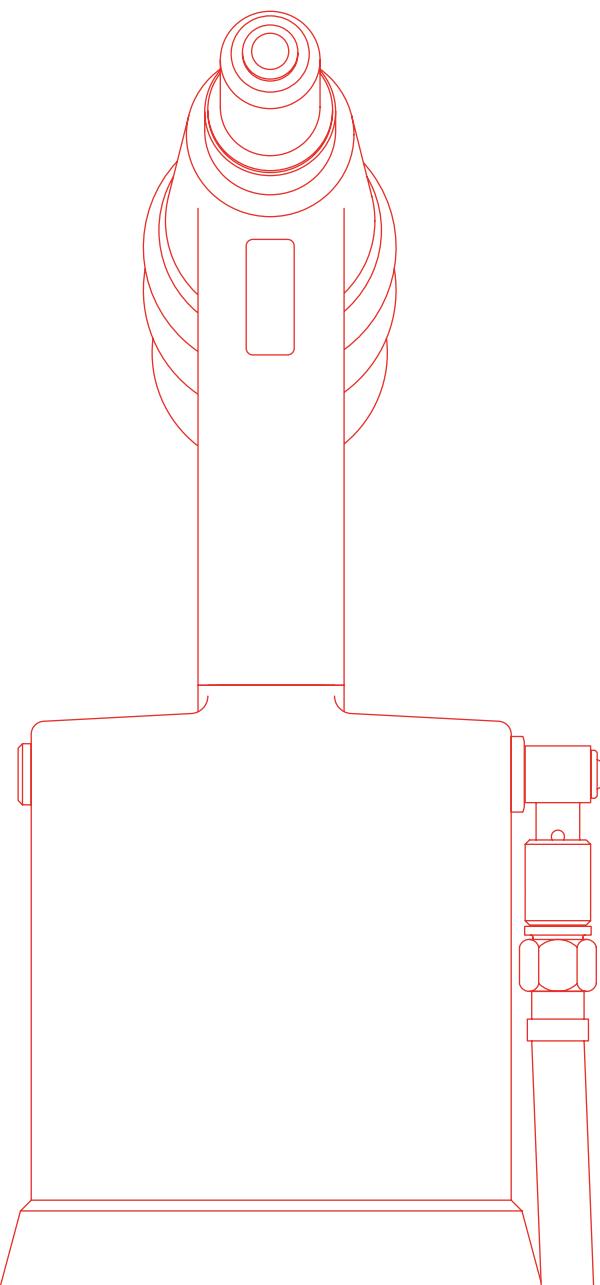

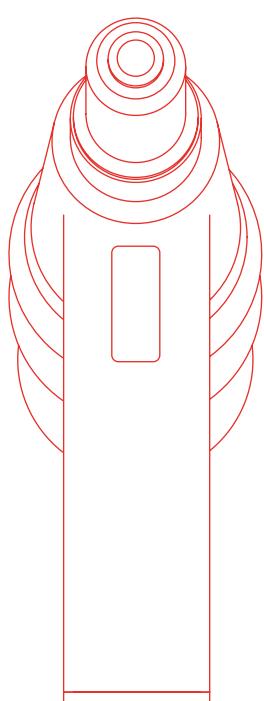

The Avdel® structural lockbolt range can provide a cost effective solution for any application, often reducing total assembly cost and time as well as inventory.

Together with our customers we develop fastening systems that simplify your production process and improve the quality and functionality of your products. We are not just a provider of fasteners and equipment but a design and development partner helping you to improve assembly and product performance.

# Avdel® Structural Lockbolt Systems

Avdel® lockbolt systems are designed for high strength, secure assembly. Quick and simple to place, durable and long lasting, they are the ideal solution where spot welding is not practical and other methods are costly, time consuming or not possible. Avdel® lockbolt systems have been widely used for many years in demanding engineering industries throughout the world, including vehicle body building, railways, construction and containers.

## Benefits of assembly

### High speed assembly

Avdel® lockbolts are placed in seconds, to provide a secure, long-lasting joint.

### High shear and tensile strength

Avdel® lockbolts have been designed to deliver the high strength performance required in load-bearing, structural applications.

### Consistent, high performance

Designed and manufactured to close tolerances, Avdel® lockbolt systems ensure consistently accurate and secure, high strength assembly. Combined with a special purpose tool, Avdel® lockbolts eliminate installation errors or variability of clamp associated with conventional assembly methods.

### Robust and rugged tools

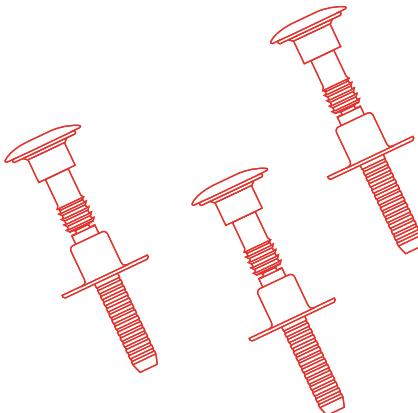

Designed for use in demanding engineering environments, these tools have a long and reliable track record. They provide consistently accurate and secure installation within a few seconds.

### Excellent vibration resistance

As permanent as a weld, Avdel® lockbolts resist loosening when all other methods fail.

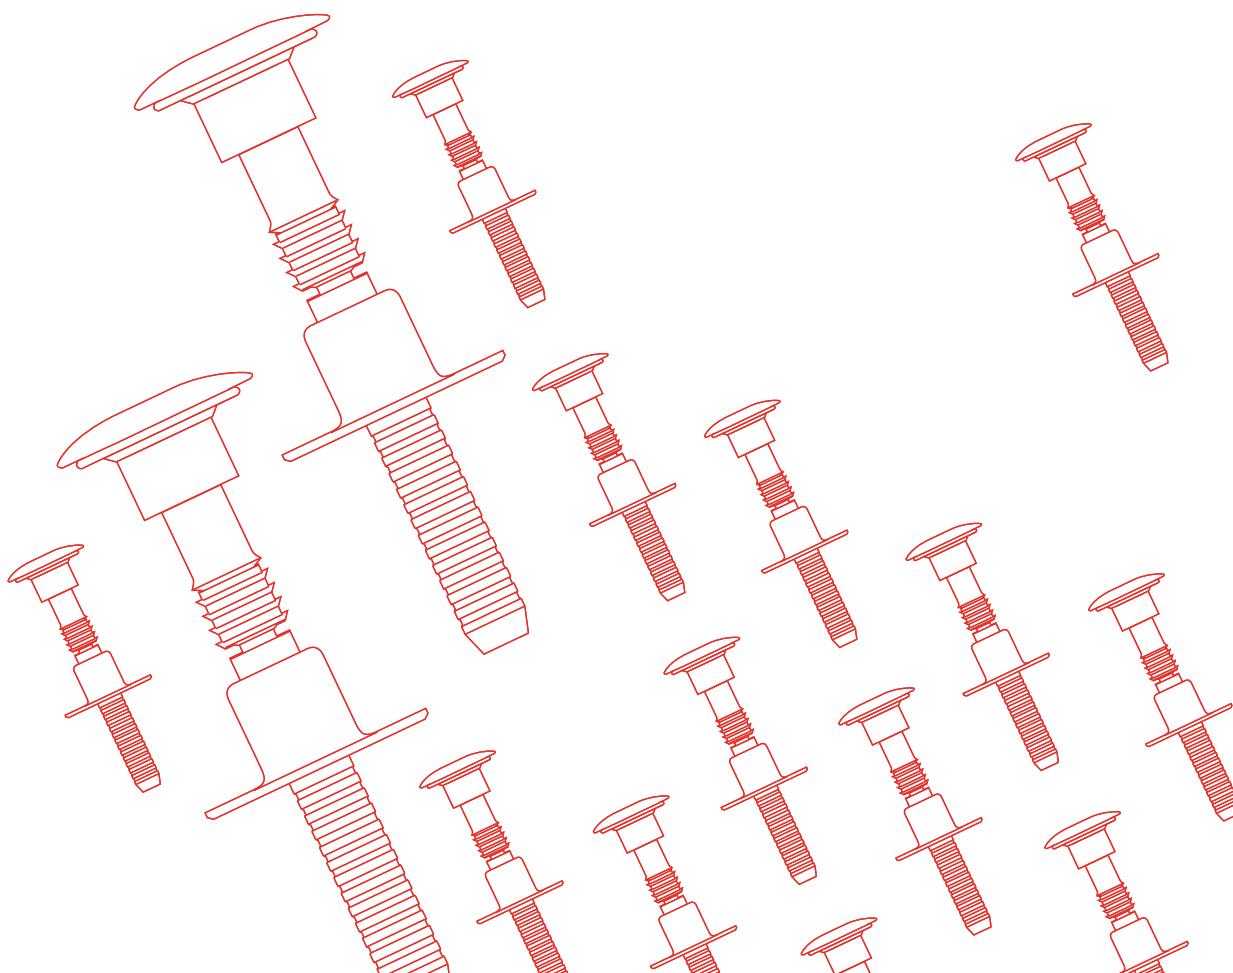

### Ease of inspection

A quick and simple visual inspection is sufficient to check that an Avdel® lockbolt has been correctly installed and tampering is immediately obvious. Avdelok®, Maxlok® and Avtainer® lockbolts are TIR approved.

# Range overview

Brand	Material	Key features
Avdelok®	Aluminium Alloy Steel Stainless Steel	High shear strength High controlled clamp
Large diameter Avdelok® LD	Steel	Exceptional shear and tensile strength Sizes from 1/2" (12.7 mm) to 1" (25.4 mm)
Maxlok®	Aluminium Alloy Steel	Wide grip range High shear strength
Avtainer®	Steel	High shear strength Joins composite panels to metal Leak resistant High speed installation
Avbolt®	Steel	Use on blind sided applications High tensile and shear strength High grip capability

# Selecting a Lockbolt Fastener

Selecting an Avdel® structural lockbolt fastener is a simple process. The factors detailed below are designed to help you identify a fastener suitable for your application:

## Fastener selection

### Accessibility

If there is only access from one side the Avbolt® structural blind fastener is the only choice. Avdelok®, Maxlok® and Avtainer® lockbolts require access from both sides of the component.

### Grip range

The fastener should be selected to ensure that the thicknesses of the parent materials fall within the grip range.

### Hole size

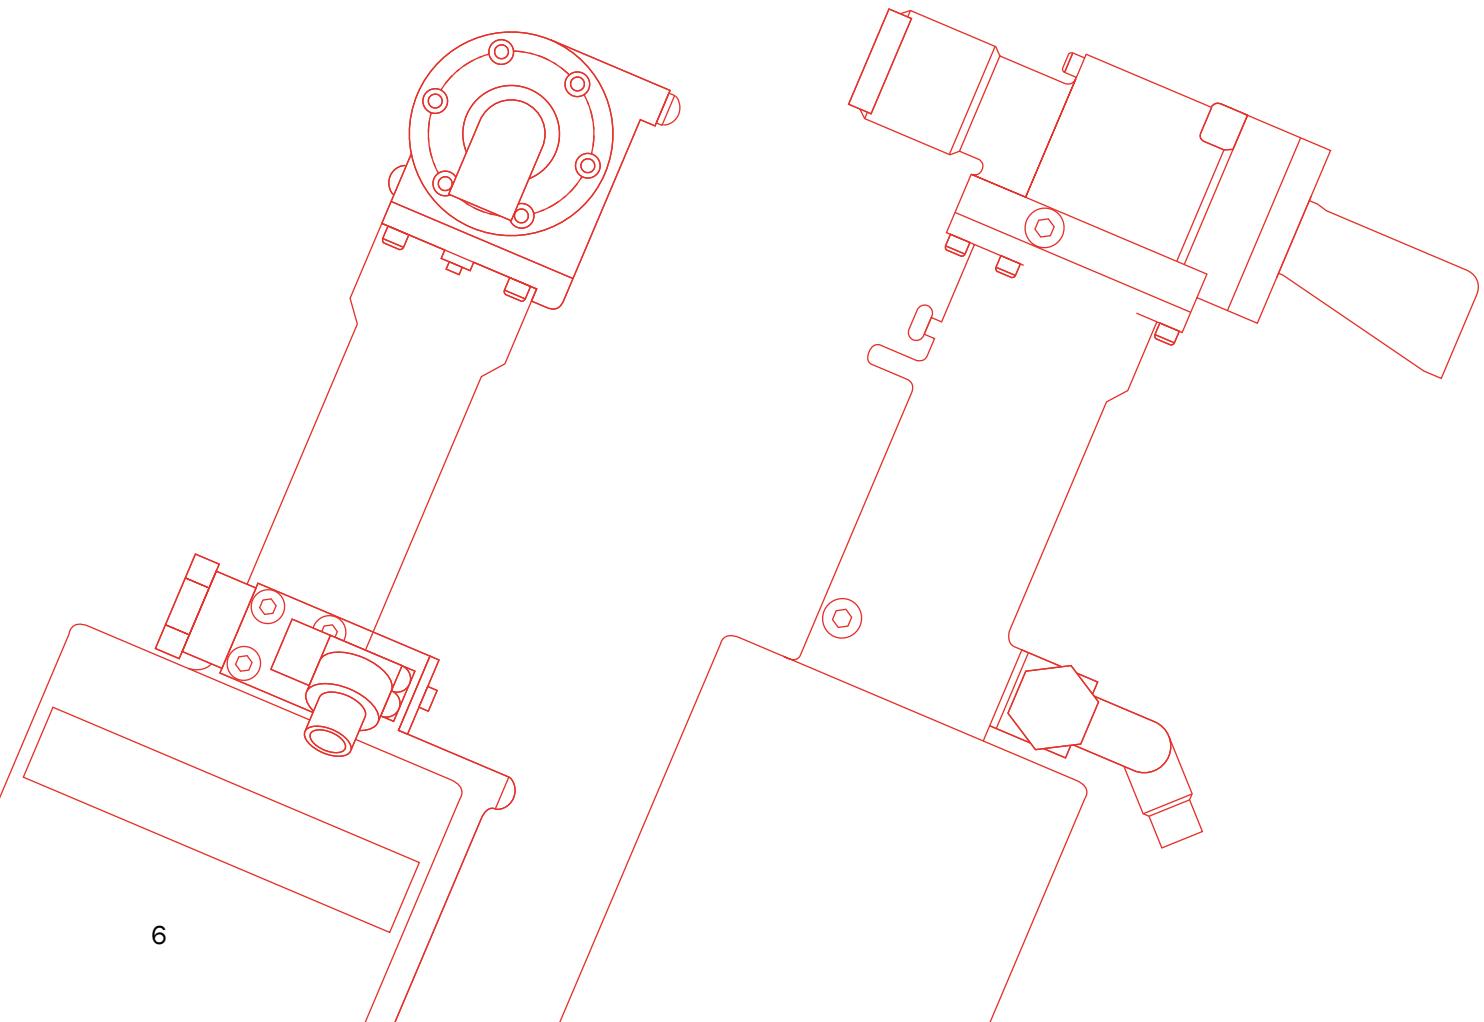

This is specified on the relevant technical data sheet for the structural fastener. It is important to control the hole size accurately in order to ensure the performance of the fastener.

### Corrosion Resistance

Material and plating selection should be based on the level of corrosion resistance required. Corrosion is best reduced by selecting a fastener material which is the same as the parent material(s). Stainless steel fasteners offer the best corrosion resistance.

### Important Information

The information on this page should be used in conjunction with the technical data available on our website [www.avdel-global.com](http://www.avdel-global.com) where you can also find additional information about corrosion, safety and RoHS.

# Selection Guide

---

This table is designed as a guide to help you select the most suitable Avdel® lockbolt for your particular application. Full technical and performance data for each fastener can be found on our website [www.avdel-global.com](http://www.avdel-global.com) or contact your local Avdel representative.

# Avdelok®

High strength, vibration resistant lockbolts with high, controlled clamp.

Avdelok®

Avdelok® LD

## Key features and benefits

- High shear strength for high strength assembly
- High, controlled clamp provides excellent vibration resistance
- Quick to install across a wide range of applications
- Comprehensive range of special purpose installation tools
- Wide choice of materials, sizes, head forms and collar options to suit a wide variety of applications
- Easy to inspect for tampering
- TIR approved
- Large diameter option from 1/2" (12.7 mm) to 1" (25.4 mm) for heavy engineering applications
- Steel Avdelok® pins typically offer comparable values to property class 5.8 threaded products
- Installed Avdelok® LD fasteners provide a minimum shear, tensile and pre-load strength which is equivalent to or exceeds property class 8.8 or ASTM A-325 standards

## Specifications

### Avdelok®

Sizes:

3/16" to 3/8"

(4.8 mm to 9.6 mm )

Materials:

Aluminium alloy, steel,  
stainless steel

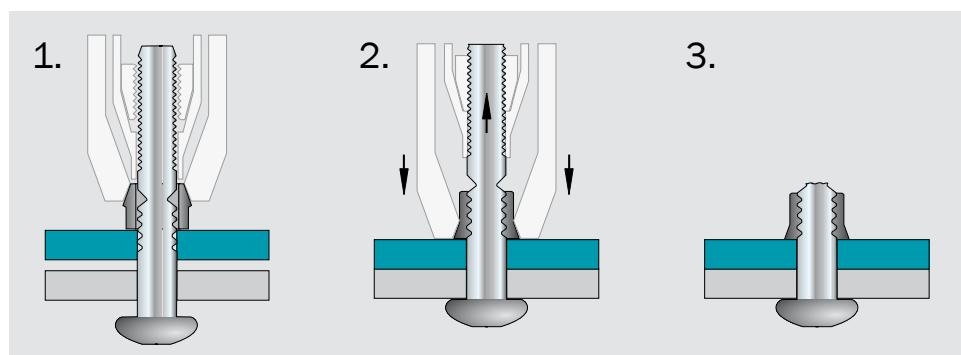

Headforms:

Brazier, countersunk, truss,  
large

Collar options:

Full, half, flanged

## Typical placing sequence

Please visit our website [www.avdel-global.com](http://www.avdel-global.com) for fastener placing animations and technical data.

### Avdelok® LD

Sizes:

1/2" to 1"

(12.7 mm to 25.4 mm )

(1<sup>1</sup>/<sub>8</sub>" / 28.6 mm optional)

Materials:

Steel

Headforms:

Round, large truss head,  
countersunk

Collar options:

Full, flanged

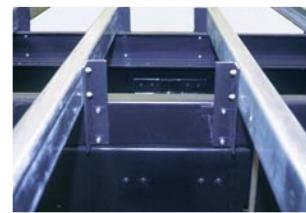

## Assembly applications

- Commercial vehicles
- Heating systems
- Steel construction
- Bridge building
- Solar panels
- Railway
- Mining

Heating systems

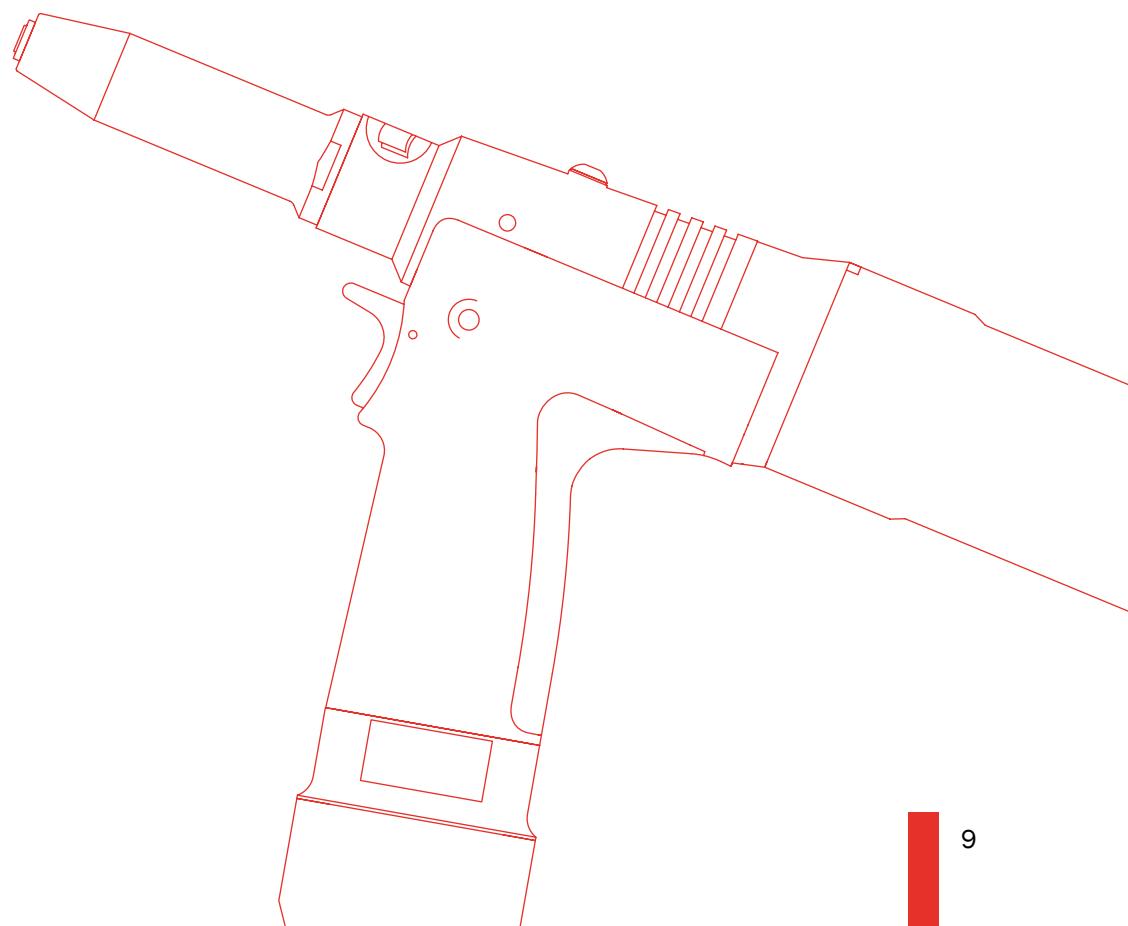

Commercial vehicles

Solar power plants

Solar power plants (detail)

# Maxlok®

High strength, vibration resistant lockbolts with multi-grip capability.

## Key features and benefits

- Wide grip range reduces inventory, simplifies stock control, and accommodates wide variations in material thickness
- High shear strength for high strength assembly
- High, controlled clamp provides excellent vibration resistance
- Wide range of special purpose installation tools
- Quick to install across a wide range of applications
- Brazier, countersunk, mushroom and truss head forms suit a wide variety of applications
- Easy to inspect tampering
- TIR approved

## Specifications

Sizes:

43/16" to 1/4"  
(4.8 mm to 6.4 mm)

Material:

Aluminium alloy, steel

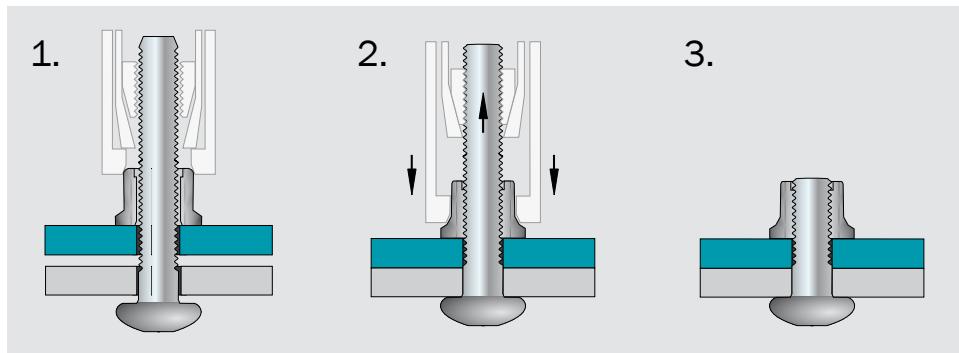

Headforms:

Brazier, countersunk,  
mushroom and truss

Collar option:

Flanged

## Typical placing sequence

Please visit our website [www.avdel-global.com](http://www.avdel-global.com) for fastener placing animations and technical data.

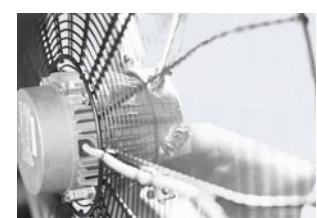

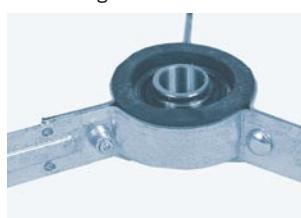

## Assembly applications

- Commercial vehicles
- Heating and ventilation
- Frame building

Commercial vehicles

Fan bearing arm

# Avtainer®

High strength, steel fastener and shell designed for joining composite panels to metal.

## Key features and benefits

- Prevents cracking and pull through of composite materials
- Ideal for the assembly of GRP vehicle panels
- High shear strength for high strength assembly
- Underhead Santoprene® seal for a water/air tight joint
- Internally locked stem provides a secure, vibration resistant joint
- Smaller shell size available for use against metal surfaces
- Low profile head and shell give a neat appearance
- Optional encapsulated heads to match the surrounding colour
- Quick to install with Genesis® power tools
- Easy to inspect for tampering
- TIR approved

## Specifications

Sizes:

3/8" (10.0 mm)

Material:

Steel

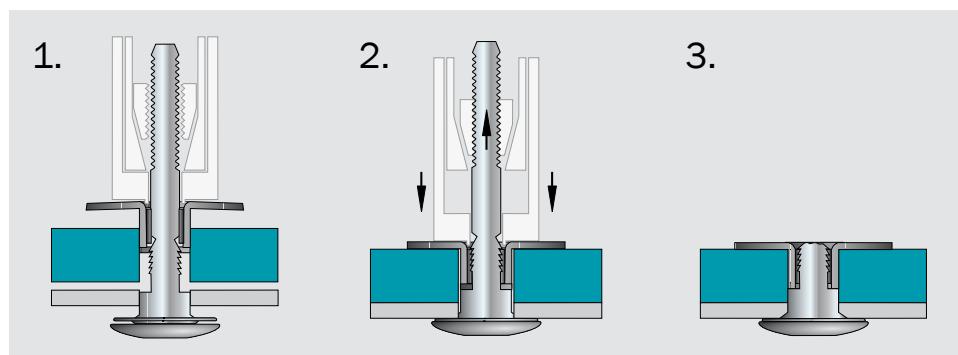

Headforms:

Low profile

Option:

Encapsulated heads

## Typical placing sequence

Please visit our website [www.avdel-global.com](http://www.avdel-global.com) for fastener placing animations and technical data.

## Assembly applications

- Commercial vehicles
- Container

# Avbolt® Structural Blind Fastener

The Avbolt® structural fastener is a high strength, tamper resistant, blind steel fastener designed for use in heavy-duty structural applications. It offers a high tensile and shear strength normally only possible with non blind lockbolts and combines it with the installation speed of blind products.

Avbolt® 3/8", 1/2" and 5/8"  
(10, 12.7 and 16 mm):  
3 piece design (sleeve, collar, stem)

Avbolt® 3/16", 1/4" and 5/16"  
(4.8, 6.4 and 8.0 mm):  
2 piece design (sleeve with collar, stem)

## Key features and benefits

- Use on blind sided application
- High tensile and shear strength for heavy-duty applications
- Wide grip capability suits a variety of material thicknesses
- Locking feature creates a vibration resistant joint and prevents loose stems
- Ideal for areas with restricted access
- Fast installation
- High security tamper resistance
- Simple tooling requires only minimum operator skill

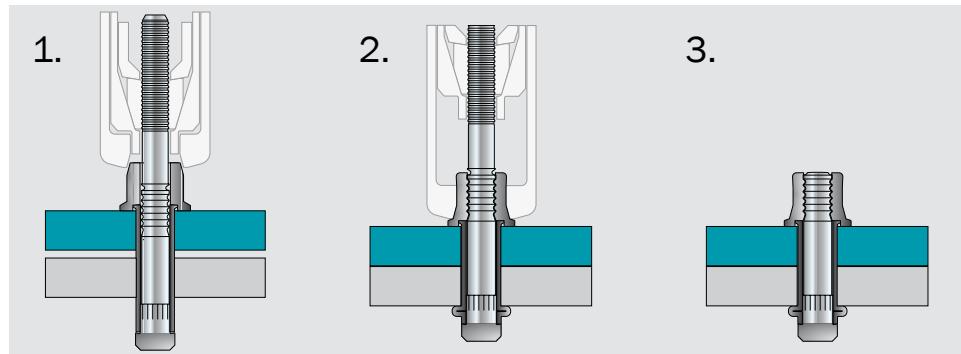

## Specifications

Sizes:  
3/16" to 5/8"  
(4.8 mm to 16.0 mm)

Material:  
Steel

Avdel Patent Protected.

## Typical placing sequence (3 piece design)

Please visit our website [www.avdel-global.com](http://www.avdel-global.com) for fastener placing animations and technical data.

## Assembly applications

- Automotive
- Construction
- Container
- Renewable energies
- Railway
- Mining
- Security fencing

# Installation Tools

## Genesis® G2 LB (71255 Model)

Lightweight tool for placing Avdelok® lockbolts ø 3/16" and 1/4" (4.8 mm and 6.4 mm) and Maxlok® lockbolts ø 3/16" (4.8 mm) at high speed making it ideal for batch or flow-line assembly.

- Ergonomic and lightweight design reduces operator fatigue
- Reduced setting time and high speed placement increases productivity
- Integral cycle counter helps establish accurate service intervals
- Toughened plastic body and heavy duty rubber base resists cracking when accidentally dropped
- Can be suspended

## Genesis® nG3

Lightweight tool for placing Avtainer® lockbolts at high speed.

- Ergonomic and lightweight design reduces operator fatigue
- High placement speed increases productivity
- Integral cycle counter helps establish accurate service intervals
- Toughened plastic body and heavy duty rubber base make it a robust tool and enhance tool life
- Soft touch rubber grip on handle
- Vacuum air supply cut-off on trigger minimizes air consumption
- Fixed stem collector bottle
- Can be suspended

## Genesis® nG4

Lightweight tool for placing Avdelok® and Maxlok® lockbolts ø 3/16" and 1/4" (4.8 mm and 6.4 mm) as well as Avtainer® lockbolts.

- Ergonomic and lightweight design reduces operator fatigue
- Quick cycle time increases productivity
- Integral cycle counter helps establish accurate service intervals
- Toughened plastic body and heavy duty rubber base make it a robust tool for a long working life
- Soft touch rubber grip on handle
- Vacuum air supply cut-off on trigger minimizes air consumption
- Fixed stem collector bottle
- Can be suspended
- Collar cropper attachment available to remove collars from installed Avdelok® and Maxlok® lockbolts

G2 LB (71255 Model)

nG3

nG4

# Installation Tools

## 722 Model

The hydro-pneumatic 722 tool is designed to place all sizes of Avdelok® lockbolts ø 3/16" to 3/8" (4.8 mm to 9.6 mm) as well as Avbolt® fasteners ø 3/16" to 5/16" (4.8 mm to 8.0 mm).

- Cast aluminium body designed for heavy duty use over long periods of time, even in the most demanding environments
- Quick and simple operation minimizes operator fatigue and reduces assembly time to a minimum
- Wide choice of nose assemblies to suit access restrictions of the application
- Collar cropper attachment available to remove collars from installed Avdelok® lockbolts

## 7287 Model

Hydro-pneumatic split tool with a lightweight placing head able to place Avdelok® and Avtainer® lockbolts up to ø 10 mm (3/8"), Avbolt® fasteners up to ø 5/16" (8 mm) and all other lockbolts up to ø 5/16" (8 mm).

- Extended stroke and pull force
- Installation of large fasteners with single pull action for high placement speed
- Short cycle time can increase assembly capacity
- Lightweight placing head reduces operator fatigue
- Remote intensifier mounted on castors for flexible use in the assembly line
- Wide choice of directly interchangeable 722 model nose assemblies to suit the access restrictions of the application
- Can be fitted with a collar cropper to remove installed Avdelok® lockbolts

## 734 Model

All Avdelok® LD lockbolts from ø 1/2" to 1<sup>1</sup>/<sub>8</sub>" (12.7 mm to 28.6 mm) can be placed securely in seconds with this range of installation tools. Avdelok® lockbolts ø 3/8" (9.6 mm) and Avbolt® ø 5/16" to 5/8" (8 mm to 16 mm) can also be installed.

- Robust and rugged installation tools designed for a long working life in extreme conditions
- Range of hydraulic power units deliver the extreme high pull pressure required for secure, long lasting assembly at high speed
- Choice of placing heads and nose equipment to suit the entire range of large diameter Avdelok® LD lockbolts as well as other lockbolt brands
- Easy-to-change nose equipment and range of hydraulic hoses in different lengths enable the tool to be adapted to suit local assembly requirements
- Mounted on castors for easy movability
- Available in voltages from 110V to 525V, diesel option customised to specification
- Switches to 'sleep' mode to conserve energy

1) Different grip range pins with different numbers of grooves available. / Tiges avec autres plages de serrage et different nombre de cannelures sont disponible./ Bolzen mit anderem Klemmbereich und anderer Anzahl von Rillen sind verfügbar. / Sono disponibili bulloni con spessori serrabili differenti con diverso numero di scanalature. / Disponibles pernos con diferente número de anillos segun el espesor a remachar.

2) Half collars increase the grip range to that of the next longest pin. Maximum grip increases by .062" for 3/16" and 1/4" fasteners and .125" for 5/16" and 3/8" fasteners.

Avec une bague courte, la plage de serrage maximale est équivalente à celle de l'Avdelok de longeur immédiatement supérieure. La plage de serrage augmente de .062" pour tiges de 3/16" et 1/4", et de .125" pour tiges de 5/16" et 3/8".

Die Verwendung von flachen Schließringen erhöht den Klemmbereich auf den des nächstlängeren Bolzens. Der maximale Klemmbereich erhöht sich um .062" für 3/16" und 1/4" Bolzen und .125" für 5/16" und 3/8" Bolzen.

Utilizzando i collari ribassati lo spessore serrabile aumenta, ed è uguale a quello massimo del bullone di misura superiore. Il massimo spessore serrabile aumenta di .062" per i bulloni da 3/16" e 1/4" e di .125" per i bulloni da 5/16" e 3/8".

El empleo de medio collar incrementa el máx. espesor a remachar al de la siguiente toma. El máximo espesor a remachar por uso de medio collar es de .062" para diámetros de 3/16" y 1/4" y de .125" para diámetros de 5/16" y 3/8".

3) Flanged collars are used in applications where the hole on the collar side of the application is oversize or is slotted for alignment purposes. To determine what length of pin is required, add dimension U to the thickness of material being fastened.

Avec une bague à embase, la plage de serrage est diminuée de la valeur de la cote U.

Schließringe mit Bund werden in Anwendungen benötigt, wo das Bohrloch auf der Schließringseite über groß oder länglich ist. Um den richtigen Bolzen zu bestimmen, addieren Sie das Maß U zu der zu verbindenden Materialstärke hinzu.

Utilizzando i collari flangiati la dimensione „U“ deve essere aggiunta allo spessore da serrare per determinare il tipo di bullone adatto.

Utilizar collar con ala cuando en la aplicación el taladro está sobredimensionado o es ranurado. Para calcular la referencia de perno necesaria añadir la cota U al espesor de la aplicación.

1) Different grip range pins with different numbers of grooves available. / Tiges avec autres plages de serrage et different nombre de cannelures sont disponible./ Bolzen mit anderem Klemmbereich und anderer Anzahl von Rillen sind verfügbare. / Sono disponibili bulloni con spessori serrabili differenti con diverso numero di scanalature. / Disponibles pernos con diferente número de anillos segun el espesor a remachar.

2) Half collars increase the grip range to that of the next longest pin. Maximum grip increases by .062" for 3/16" and 1/4" fasteners and .125" for 5/16" and 3/8" fasteners.

Avec une bague courte, la plage de serrage maximale est équivalente à celle de l'Avdelok de longeur immédiatement supérieure. La plage de serrage augmente de .062" pour tiges de 3/16" et 1/4", et de .125" pour tiges de 5/16" et 3/8".

Die Verwendung von flachen Schließenringen erhöht den Klemmbereich auf den des nächstlängeren Bolzens. Der maximale Klemmbereich erhöht sich um .062" für 3/16" und 1/4" Bolzen und .125" für 5/16" und 3/8" Bolzen.

Utilizzando i collari ribassati lo spessore serrabile aumenta, ed è uguale a quello massimo del bullone di misura superiore. Il massimo spessore serrabile aumenta di .062" per i bulloni da 3/16" e 1/4" e di .125" per i bulloni da 5/16" e 3/8".

El empleo de medio collar incrementa el máx. espesor a remachar al de la siguiente toma. El máximo espesor a remachar por uso de medio collar es de .062" para diámetros de 3/16" y 1/4" y de .125" para diámetros de 5/16" y 3/8".

3) Flanged collars are used in applications where the hole on the collar side of the application is oversize or is slotted for alignment purposes. To determine what length of pin is required, add dimension U to the thickness of material being fastened.

Avec une bague à embase, la plage de serrage est diminuée de la valeur de la cote U.

Schließenringe mit Bund werden in Anwendungen benötigt, wo das Bohrloch auf der Schließenringseite über groß oder länglich ist. Um den richtigen Bolzen zu bestimmen, addieren Sie das Maß U zu der zu verbindenden Materialstärke hinzu.

Utilizzando i collari flangiati la dimensione „U“ deve essere aggiunta allo spessore da serrare per determinare il tipo di bullone adatto.

Utilizar collar con ala cuando en la aplicación el taladro está sobredimensionado o es ranurado. Para calcular la referencia de perno necesaria añadir la cota U al espesor de la aplicación.

Ø nom.	Ibf <sup>4)</sup>	Ibf <sup>4)</sup>
3/16" (4.8 mm)	1940	1650
1/4" (6.4 mm)	3310	3000
5/16" (8.0 mm)	5030	4900
3/8" (9.6 mm)	7210	6500

4) These figures represent minimum fastener shear and tensile strength values with the use of a full collar. When using half collars tension is reduced to approximately 45 %.

Cette valeurs représentent minimum résistances au cisaillement et à la traction avec l'usage d'une bague standard. Avec l'usage des bagues courtes la résistance à la traction se diminue à env. 45 %. Diese Werte repräsentieren Minimum Scher- und Zugfestigkeiten der Verbindung unter Verwendung von Standard-Schließenringen. Bei Verwendung von flachen Schließenringen reduziert sich die Zugfestigkeit auf ca. 45 %.

I dati si riferiscono a bulloni installati con collari Standard, utilizzando collari ribassati i valori di trazione diminuiscono del 45 % circa, i valori di taglio rimangono invariati. I dati indicati in tabella sono minimi.

La figura representa los valores mínimos de resistencia a la cortadura y tracción cuando se utiliza collar estándar. Cuando se utiliza medio collar se reducen aproximadamente en un 45 %.

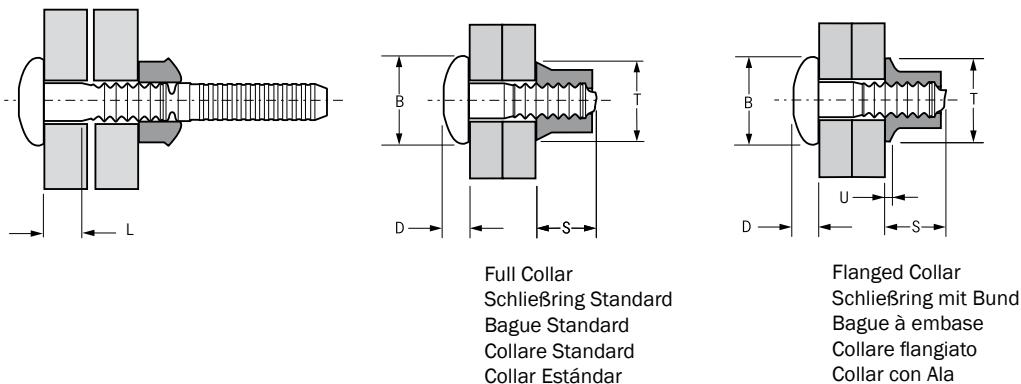

Steel Avdelok® pins typically offer comparable values to property class 5.8 threaded products. / Les tiges Avdelok® acier offrent des valeurs comparables à celles d'un boulon de classe 5.8. / Avdelok® Bolzen aus Stahl bieten Werte, die normalerweise mit denen eines Gewindeproduktes der Festigkeitsklasse 5.8 gleichzusetzen sind. / I bulloni Avdelok® in acciaio normalmente offrono valori comparabili alla classe di resistenza 5.8 dei prodotti filettati. / Los pernos Avdelok® de acero suelen ofrecer resistencias que equivalen a la calidad 5.8 de los tornillos.

all dimensions in inches / en pouces / alle Maße in Zoll / in pollici / en pulgadas

1) Different grip range pins with different numbers of grooves are available

Tiges avec autres plages de serrage et different nombre de cannelures sont disponible.

Bolzen mit anderem Klemmbereich und anderer Anzahl von Rillen sind verfügbar

Sono disponibili bulloni con spessori serrabili differenti con diverso numero di scanalature

Disponibles pernos con diferente número de anillos según el espesor a remachar

2) Half collars increase the grip range to that of the next longest pin. Maximum grip increases by .062" for 3/16" and 1/4" fasteners and .125" for 5/16" and 3/8" fasteners.

Avec une bague courte, la plage de serrage maximale est équivalente à celle de l'Avdelok de longeur immédiatement supérieure. La plage de serrage augmente de .062" pour tiges de 3/16" et 1/4", et de .125" pour tiges de 5/16" et 3/8".

Die Verwendung von flachen Schließringen erhöht den Klemmbereich auf den des nächstlängeren Bolzens. Der maximale Klemmbereich erhöht sich um .062" für 3/16" und 1/4" Bolzen und .125" für 5/16" und 3/8" Bolzen.

Utilizzando i collari ribassati lo spessore serrabile aumenta, ed è uguale a quello massimo del bullone di misura superiore. Il massimo spessore serrabile aumenta di .062" per i bulloni da 3/16" e 1/4" e di .125" per i bulloni da 5/16" e 3/8".

El empleo de medio collar incrementa el máx. espesor a remachar al de la siguiente toma. El máximo espesor a remachar por uso de medio collar es de .062" para diámetros de 3/16" y 1/4" y de .125" para diámetros de 5/16" y 3/8".

3) Flanged collars are used in applications where the hole on the collar side of the application is oversize or is slotted for alignment purposes. To determine what length of pin is required, add dimension U to the thickness of material being fastened.

Avec une bague à embase, la plage de serrage est diminuée de la valeur de la cote U.

Schließringe mit Bund werden in Anwendungen benötigt, wo das Bohrloch auf der Schließringseite über groß oder länglich ist. Um den richtigen Bolzen zu bestimmen, addieren Sie das Maß U zu der zu verbindenden Materialstärke hinzu.

Utilizzando i collari flangiati la dimensione „U“ deve essere aggiunta allo spessore da serrare per determinare il tipo di bullone adatto.

Utilizar collar con ala cuando en la aplicación el taladro está sobredimensionado o es ranurado. Para calcular la referencia de perno necesaria añadir la cota U al espesor de la aplicación.

3/16" (4.8 mm)	1050	1060
1/4" (6.4 mm)	1875	1780
5/16" (8.0 mm)	2925	2850
3/8" (9.6 mm)	4200	4200

4) These figures represent minimum fastener shear and tensile strength values with the use of a full collar. When using half collars tension is reduced to approximately 45 %.

Cette valeurs représentent minimum résistances au cisaillement et à la traction avec l'usage d'une bague standard. Avec l'usage des bagues courtes la résistance à la traction se diminue à env. 45 %.

Diese Werte repräsentieren Minimum Scher- und Zugfestigkeiten der Verbindung unter Verwendung von Standard-Schließringen. Bei Verwendung von flachen Schließringen reduziert sich die Zugfestigkeit auf ca. 45 %.

I dati si riferiscono a bulloni installati con collari Standard, utilizzando collari ribassati i valori di trazione diminuiscono del 45 % circa, i valori di taglio rimangono invariati. I dati indicati in tabella sono minimi.

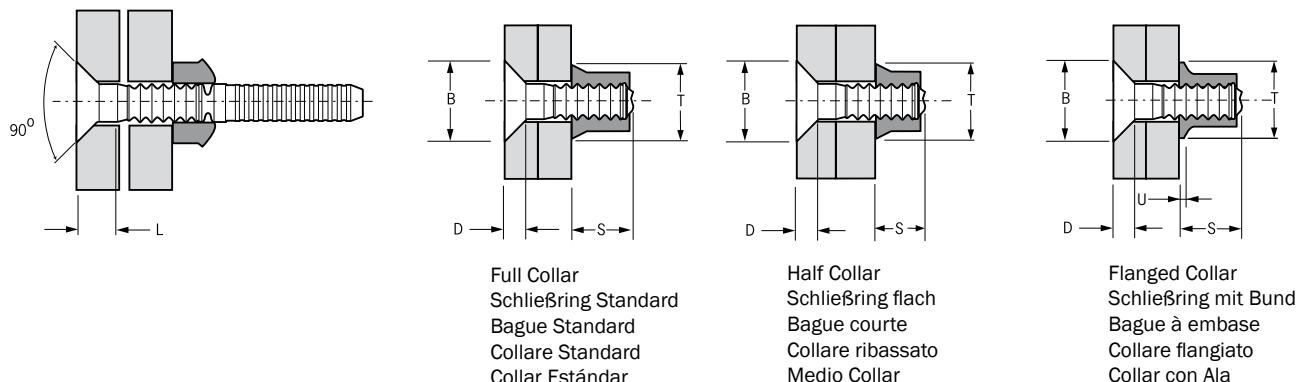

La figura representa los valores mínimos de resistencia a la cortadura y tracción cuando se utiliza collar estándar. Cuando se utiliza medio collar se reducen aproximadamente en un 45 %.

all dimensions in inches / en pouces / alle Maße in Zoll / in pollici / en pulgadas

1) Different grip range pins with different numbers of grooves are available

Tiges avec autres plages de serrage et different nombre de cannelures sont disponible.

Bolzen mit anderem Klemmbereich und anderer Anzahl von Rillen sind verfügbar

Sono disponibili bulloni con spessori serrabili differenti con diverso numero di scanalature

Disponibles pernos con diferente número de anillos según el espesor a remachar

2) Half collars increase the grip range to that of the next longest pin. Maximum grip increases by .062" for 3/16" and 1/4" fasteners and .125" for 5/16" and 3/8" fasteners.

Avec une bague courte, la plage de serrage maximale est équivalente à celle de l'Avdelok de longeur immédiatement supérieure. La plage de serrage augmente de .062" pour tiges de 3/16" et 1/4", et de .125" pour tiges de 5/16" et 3/8".

Die Verwendung von flachen Schließringen erhöht den Klemmbereich auf den des nächstlängeren Bolzens. Der maximale Klemmbereich erhöht sich um .062" für 3/16" und 1/4" Bolzen und .125" für 5/16" und 3/8" Bolzen.

Utilizzando i collari ribassati lo spessore serrabile aumenta, ed è uguale a quello massimo del bullone di misura superiore. Il massimo spessore serrabile aumenta di .062" per i bulloni da 3/16" e 1/4" e di .125" per i bulloni da 5/16" e 3/8".

El empleo de medio collar incrementa el máx. espesor a remachar al de la siguiente toma. El máximo espesor a remachar por uso de medio collar es de .062" para diámetros de 3/16" y 1/4" y de .125" para diámetros de 5/16" y 3/8".

3) Flanged collars are used in applications where the hole on the collar side of the application is oversize or is slotted for alignment purposes. To determine what length of pin is required, add dimension U to the thickness of material being fastened.

Avec une bague à embase, la plage de serrage est diminuée de la valeur de la cote U.

Schließringe mit Bund werden in Anwendungen benötigt, wo das Bohrloch auf der Schließringseite über groß oder länglich ist. Um den richtigen Bolzen zu bestimmen, addieren Sie das Maß U zu der zu verbindenden Materialstärke hinzu.

Utilizzando i collari flangiati la dimensione „U“ deve essere aggiunta allo spessore da serrare per determinare il tipo di bullone adatto.

Utilizar collar con ala cuando en la aplicación el taladro está sobredimensionado o es ranurado. Para calcular la referencia de perno necesaria añadir la cota U al espesor de la aplicación.

Ø nom.	Ibf <sup>4)</sup>	Ibf <sup>4)</sup>
3/16" (4.8 mm)	1050	1060
1/4" (6.4 mm)	1875	1780
5/16" (8.0 mm)	2925	2850
3/8" (9.6 mm)	4200	4200

4) These figures represent minimum fastener shear and tensile strength values with the use of a full collar. When using half collars tension is reduced to approximately 45 %.

Cette valeurs représentent minimum résistances au cisaillement et à la traction avec l'usage d'une bague standard. Avec l'usage des bagues courtes la résistance à la traction se diminue à env. 45 %.

Diese Werte repräsentieren Minimum Scher- und Zugfestigkeiten der Verbindung unter Verwendung von Standard-Schließringen. Bei Verwendung von flachen Schließringen reduziert sich die Zugfestigkeit auf ca. 45 %.

I dati si riferiscono a bulloni installati con collari Standard, utilizzando collari ribassati i valori di trazione diminuiscono del 45 % circa, i valori di taglio rimangono invariati. I dati indicati in tabella sono minimi.

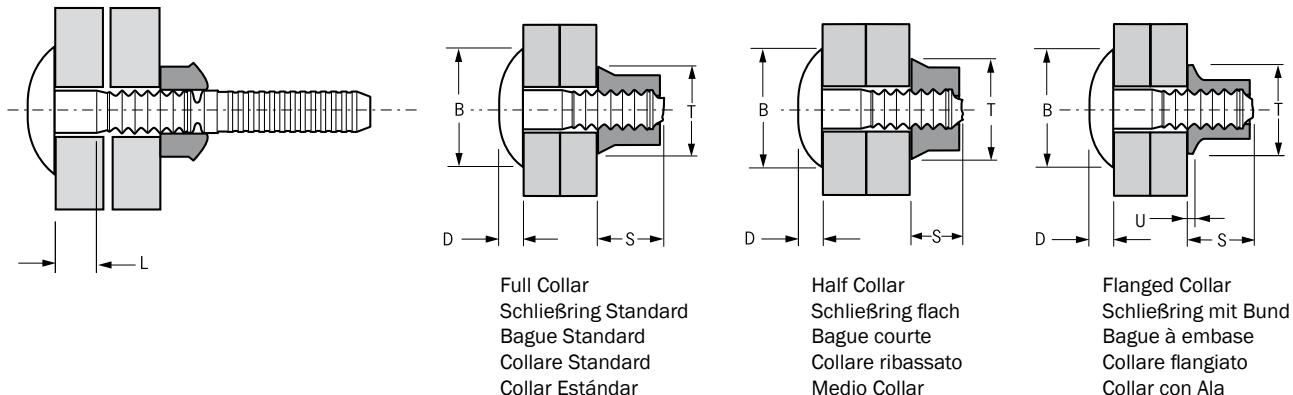

La figura representa los valores mínimos de resistencia a la cortadura y tracción cuando se utiliza collar estándar. Cuando se utiliza medio collar se reducen aproximadamente en un 45 %.

Ø nom.				Installed Avdelok® LD fasteners provide a minimum shear, tensile and pre-load strength, which is equivalent to or exceeds property class 8.8 or ASTM A-325 standards. Made to British Standard B7805: Part 2:1997, the Avdelok® LD fastener is the perfect alternative to grade 8.8 threaded fasteners, providing a permanent, high tensile friction grip joint but without the risk of loosening.
1/2" (12.7mm)	14400	17050	12050	Une fois posées les fixations Avdelok® LD proposent des performances de résistance au cisaillement et à l'arrachement et une pré-tension qui sont équivalentes ou meilleures que les propriétés d'une classe 8.8 ou de la norme ASTM A-325. Fabriquées selon la norme Anglaise B7805: Part 2:1997, la fixation Avdelok® LD est une parfaite alternative aux boulons de classe 8.8 et offre un assemblage permanent, haute résistance sans risque de desserrage.
5/8" (15.9mm)	22500	27100	19200	Verarbeitete Avdelok® LD Schließringbolzen bieten Mindestwerte für Scher- und Zugbruchlast sowie Vorspannkraft, die der Festigkeitsklasse 8.8 oder ASTM A-325 Standards entsprechen oder übertreffen. Avdelok® LD werden nach British Standard B7805: Part 2:1997 hergestellt. Sie sind die perfekte Alternative zu 8.8 Gewindeprodukten und bieten eine dauerhafte, hochfest vorgespannte Verbindung ohne Risiko des ungewollten Lösen.
3/4" (19.1mm)	32400	40100	28400	I bulloni a strappo Avdelok® LD, una volta installati sono paragonabili o superiori alle classi di resistenza 8.8 o ASTM A-325. Costruiti secondo le norme Britanniche B7805: Parte 2:1997, i bulloni a strappo Avdelok® LD sono perfettamente alternativi al grado di resistenza 8.8. dei bulloni tradizionali, garantendo però un sicuro e permanente serraggio senza rischi di manomissione.
7/8" (22.2mm)	43400	55450	39250	Los remaches Avdelok® LD proporcionan una resistencia a cortadura y a tracción y proporcionan una fuerza de apriete, equivalentes o superiores a la tornillería de clase 8.8 o ASTM A-325. Fabricados bajo la norma British Standard B7805, parte 2:1997, los remaches Avdelok® LD son la alternativa perfecta a la tornillería de clase 8.8, proporcionando una alta fricción permanente entre las piezas a unir sin el riesgo de aflojado que tienen las uniones atornilladas.
1" (25.4mm)	56500	72700	51500

## The Range of Avdel® Blind Fastening Systems

---

### Speed Fastening® Systems

Extra fast and reliable fastening from one side.  
Rivets are fed automatically.

### Breakstem Systems

Blind fastening systems with various features from multi-grip capability to high strength stainless steel rivets.

### Lockbolt Systems

High clamp force and vibration resistance for the highest strength joints.

### Blind Threaded Inserts

Fast system for sustainable threads with high torque-to-turn.

### Installation Equipment

From manually operated handtools to customised assembly workstations.
